

Generator Mini, compact unit with integrated buffer vessel for one workstation, 15 - 25 motorcycle/passenger car tyres/hour, nitrogen purity is adjustable

Generator ECO Mobility, mobile compact unit with integrated buffer vessel. Approx. 15 - 25 passenger car tyres/hour, nitrogen purity is adjustable

N₂

Generators with special housing or special technical requirements according to customer specifications.

N₂

Generator POWER TRUCK "Profi", professional version for truck tyres with electronical switch-off, multiple tyre filling possible 8 - 30 tyres/hour, booster integration possible, expandible.

Generator POWER TRUCK "Lite", economical version for truck tyres with electronical switch-off, 8-12 tyres / hour.

www.dwt-gmbh.de

Generator HP, for central alignment of more than one machine using nitrogen, 10 - 60 passenger car tyres per hour, nitrogen purity is adjustable.

Technical features

1. Use of high quality laboratory air filters
2. Nitrogen purity adjustable
3. Double automatic condensate removal
4. Indication of filter pollution
5. Expandible to double Capacity
6. Expandible to triple Capacity
7. With pressure switch and solenoid valve for external storage
8. Electronic condensate removal
9. Active carbon filtration for removal of oil vapour
10. Optional pneumatic booster

Accessories

External nitrogen storage

Measuring device for nitrogen

Electronical filling change device
